 [Github:cleitonBarros](https://github.com/cleitonBarros)
 Resende, Rio de janeiro, Brasil

Objective

To work with front-end web development.

Professional summary

I am degree in Information Systems and have a strong passion for technology. Currently, I work as a freelancer, specializing in creating landing pages. My main stack is ReactJS with TypeScript and styled-components, but I have experience with various technologies and tools including HTML, CSS, SASS, Bootstrap, Tailwind, JavaScript, PHP, React Native, Vue.js, Figma, and WordPress. Throughout my professional journey, I have led and contributed to a project called "Center it", a business-to-consumer application that utilized technologies such as JavaScript, React, React-Native, and PostgreSQL. Additionally, I gained valuable experience as a web developer at Empório High-Tech, where I used WordPress. Furthermore, I actively volunteered for the "Lacrei Saúde" project, undertaking responsibilities in interface development and maintenance. Within this context, I utilized React skills, along with the advantages offered by frameworks like Gatsby and Next.js.
